Our War Chat

HOW WILL THE WAR AFFECT BUSINESS?

Every day we are asked our opinion as to what effect the war will have on business. We believe if we talk and act wisely, business will continue to hold good for the following reasons:

War in itself does not cause business depression. Billions of dollars of real money is to be expended by the government, the largest part will be spent here in our country. This will in itself create wealth and is bound to **KEEP WAGES GOOD AND EMPLOYMENT FOR EVERYBODY.**

Besides the enormous task of feeding and clothing our own big army to be raised, we will have to supply the larger part for the rest of the world with the same necessities, this alone will mean **GOOD PRICES FOR EVERYTHING THAT GROWS OUT OF THE GROUND** or is produced by our factories, which we will profit by the first mentioned. Real Patriotic Economy means the elimination of waste and extravagance. It does not mean hoarding our money, buying more than we need of food stuffs, clothing, etc., which of course would show some shortage. It is for you to pursue the same walk in life, using common sense methods, as you have always done. Have unflinching faith in the God of the Universe, and in your Grand Country, the U. S. A. which has unlimited resources, in men, money and material, besides having the Greatest President of any Country in the World.
